Orion Autoguiding Review

For a long time the default standard for all new astrophotographers was to get the Orion Starshoot autoguiding, and that is still one of the most popular choices. Not only is this true because they work very well and are supported by virtually every software guiding package out there, but also because they are one of the few manufacturers who put together complete kits for you.

Best Autoguiding and Guide Scope for 2021 - Astronomy Online

Reviewed in the United States on October 7, 2019 This is a nice little camera that, when it works, works great. Alas, I can only get it to guide for a few minutes before PHD / ASCOM loses connection and I have to restart the entire thing (including unplug/plug USB). These connection problems make it unusable for the most part.
